Licensed by New York State and accredited by AAHC  
(Association of Ambulatory Health Care)

# Choices welcomes women from out-of-town

Choices Women's Medical Center is located in New York City, and women come here from many states and countries.

## Before Roe, There was Choices...

For over 40 years, Choices has been committed to helping women make the best decisions for themselves and their families.

We are here to assist you.

When our doors opened in 1971, our very first patient was from New Jersey, a state that did not allow abortion services at that time. Abortions are more widely available today, but many states have restrictions that make them difficult to obtain. New York State has few restrictions, and Choices is one of the few women's clinics that offer abortions up to 24 weeks of pregnancy. There are no waiting periods, and parental or spousal consent or notification is never required for women of any age. Our services are completely confidential.

Depending on how far along a woman is in pregnancy, the abortion procedure may require her to come in on two consecutive days. To assist women coming from out-of-town, Choices has developed a package that includes overnight accommodations at a nearby hotel for her and her partner, family member or a friend. We also can assist women in making transportation arrangements.

Our trained, compassionate female counselors are ready to discuss all questions and personal concerns women may have. A counselor will go over all steps of the abortion procedure, as well as post-abortion care and birth control methods. We encourage partners/spouses or another family member to attend the counseling session, as well, and ask that women under 18 be accompanied by a trusted adult 18 or over. During the procedure itself, family members or friends can wait in our comfortable waiting area. We take New York state medicaid, most insurance plans and credit cards. Please speak to our Out-of-Town Counselor about financial problems.

Located a short distance from LaGuardia and Kennedy Airports. Easy commute via subway, train, bus or car from all New York City boroughs and the tri-state region.
